

Accounting Software Comparison Report 2023

vs

odoo

Introduction

Xero is a popular accounting software in New Zealand. Odoo, while still relatively unknown to New Zealand enterprises, is a leading suite of business management software globally. For a fair comparison, this document has been prepared based on Xero's Standard Plan and Odoo Accounting (singular app) on a Standard Plan. Both are billed monthly and cloud hosted.

Founded in 2006, Xero is a NZ based technology company that provides cloud-based accounting software for small to medium sized businesses. Xero is based on a SAAS model and sold by subscription which is stipulated by the type and number of entities of subscribers.

"Beautiful accounting software"

Founded in Belgium in 2004, Odoo is a suite of open-source business applications. Odoo is available in 3 editions: Community (free to download), Enterprise (more features than Community but with yearly cost), and Online (cloud based and billed monthly).

Pro

We were using Quickbooks, which had, at the time, very limited cloud-based capability. Xero looked great, was easy to use, and made it possible for our virtual team to work together

Pro

Search is fast and flexible, a lot of combination search function. Easy to use with the same UI style, UI is very clean not messy.

Con

Customer Service was horrible. You could not talk to someone when you wanted to.

Con

The support is terrible, specially in UAE, the account managers for enterprise never respond and tickets are open for 3 and 4 days.

Xero vs Odoo in New Zealand

As the below Google Trend graphs show, Xero is a well-known player in the New Zealand market, while Odoo is still relatively unknown.

As a suite of business management tools, Odoo is growing in popularity amongst growing NZ businesses who are looking for an ERP solution or who have outgrown their standalone accounting software. In some cases, business leaders are looking for a software solution that will integrate with Xero, other times, they are looking to replace Xero as part of their ERP implementation. In both scenarios, the information in this document is a good tool to discover and compare the most important aspects of each accounting solution to find the software that best works for you.

This report was compiled by Wedoo. We have done our best to keep the comparison objective and fair, updating and adapting the feature comparison presented in Odoo's 2022 Accounting Software Comparison Whitepaper. If you find a mistake or missing feature, please let us know at hello@wedoo.co.nz.
